

TESTIMONIALS

I have used Construction Maestro for years. I have sold over 200 buildings using Construction Maestro. Last year, Maestro helped me generate \$500,000+ in pole barn and garage sales. Building inspectors love seeing the quality drawings. Overall I am extremely satisfied with the simplicity of use and excellent technical support received by using Construction Maestro.

~Mike Stump, Carter Lumber, Conneaut Lake PA~

\$500,000+ IN POLE BARN AND GARAGE SALES

AN INTEGRAL PART OF OUR BUSINESS

I have to say, this program has been a godsend for me as I continue to learn about the pole barn industry! I get so many compliments on the drawings I am able to produce with your program. It has become an integral part of our business! Thank you to you and your staff for all your hard work and dedication! Your tech support and

professionalism is second to none!! I look forward to 5.0 and all the changes you have made. Changes that prove your customers input and their satisfaction is your number one goal!

~Dana Andrews, Double O Builders, Fort Plain NY~

I have been using Maestro for approximately 8 years and I had it installed at the Caro location approximately one year ago. Once the salesmen were trained, they could not believe how fast and accurately they can turn around quotes.

Maestro is the tool that has helped our store sell more packages. In my career I have seen too many salesmen lose jobs because they simply take too long to bid a project, we

can now sit down with a customer and literally price out a project in 10 minutes and close the deal before the customer walks out the door. Maestro saves time and allows salesman to focus on selling more packages. Maestro prints out a full set of plans and specs so there is no confusion between customer and salesman as to how the project is to be built...It is my opinion that there is no other software program that compares to Maestro.

~Dwayne Richmond- Manager, Carter Lumber, Caro MI~

ALLOWS SALESMAN TO FOCUS ON SELLING MORE PACKAGES

LOOK MORE PROFESSIONAL

customer is sure of what he is getting by the detailed drawings, layouts, and quotation pages created. When using the material list to schedule deliveries, I'm confident that returns will be very minimal to none at all. Keeping the price updated is fast and simple with the use of Excel sheets. Price changes from vendors can be done with mass updates. The support

from Mike and the staff has been great. They are always willing to solve any problems or answer any questions that I've had. By using Construction Maestro, we are better prepared and look more professional quoting and selling post frame buildings and garages.

~Rodney Hicks-Assistant Manager, Carter Lumber, Shelby OH~

TECHNICAL SUPPORT ONCE AGAIN IS FAR SUPERIOR

After using the Construction Maestro software, it beats all others hands down!! The simple to use software is accurate & definitely a time saver. I can have four buildings done & priced with all accurate steel cuts in the time that it would take to draw on by hand. The internal

technical support once again is far superior then any others. Thanks to Construction Maestro, it not only decreases the time in figuring a building, but increases sales. The detailed generated drawings can be turned into the local building department to help the customer obtain their building permits.

~**Ron Tarter, Carter-Jones Lumber, Akron OH**~

Construction Maestro from Symun Systems has increased my sales and freed up my time. I can quote and sell more buildings in a fraction of the time it used to take me to figure them by hand. I couldn't imagine doing my job without it. It does everything I

I COULDN'T IMAGINE DOING MY JOB WITHOUT IT

want and then some. My customers get their quotes faster and with layouts, elevations and details with just a couple clicks of a button. And I get detailed material lists, cut lists, steel order forms, etc... everything I need to bid and then sell and order a building. The program is easy to use and the customer service is great. Maestro is continually updating their software and I can't wait to get the next update that is promised to do much, much more. I personally recommend this program to anyone that is serious in selling post frame buildings, garages or decks. It has increased my sales and it will yours too.

~**Chris Stone, Carter Lumber, Burton MI**~

Our experience with Construction Maestro has been nothing short of excellent. The training, the support and the software itself are of the highest quality. We've tried other estimating software but nothing stands up to Maestro. USA Pole Barns will never use anything else.

~**Rich Williams-Owner, USA Pole Barns, Lima OH**~

Historically, we've never dipped into post frame work much. However, with the housing market the way it's been for the last few years, business has slowed down. We're located in a fiercely competitive market and thankfully we've had Construction Maestro to help us break into post frame construction. It's really saved our business!

IT REALLY SAVED OUR BUSINESS!

~**Gary Copp-Owner, Carson City Lumber, Carson City MI**~

ESTIMATES DONE IN FIVE TO TEN MINUTES

I am very happy with Construction Maestro. I do many pole barn and garage estimates using the system. Estimates that used to take 30 minutes or more are now done in five to ten minutes. My customers find my estimates very impressive when they receive detailed, labeled plans with color drawings. The labor module is

great for completed buildings and allows me to update my pricing easily. Product pricing is equally simple which is nice since steel prices are constantly changing. Technical support is always helpful and I don't get the run around that you'd get from most software companies and Symun Systems is constantly sending out new updates to keep the software current.

~**Larry Greener-Owner, Greener's Budget Lumber Inc, Barron WI**~

**EASY TO LEARN.
THE FIRST IMPRESSION IS
A LASTING IMPRESSION**

This is the third building pricing program that I have used in the post frame building industry. The Construction Maestro program is easy to learn with excellent technical support, accurate, detailed, and has a very nice 3D building drawing for the customer. As we all know in the post frame building business, the first impression is a lasting impression. When my customers see their building

proposal done on the Construction Maestro program, they remember Lamperts, and that's important to me!

~Larry Miller-Salesman, Lamperts, Sioux Falls SD~

This program has saved me countless hours on drawings, takeoffs, and pricing the total job. This program will save you money and material, and allow you to get in front of more people. There is nothing like creating your customer's building right in front of them at the kitchen table. "SOLD!"

~Al Irvin, H & H Custom Building, Townsend MT~

**GET IN FRONT OF
MORE PEOPLE.
"SOLD!"**

As the owner of eighteen small companies, I have to deal and train with a lot of companies. When I saw Maestro software in action at our lumber company's post frame building division, I was impressed. However, I was even more impressed when I attended their training seminar and realized immediately that Mike Rinks, our client support executive, and the whole Symun Systems staff really know what they are doing. Without hesitation, I highly recommend Mike Rinks and Maestro.

~Billy R. Inmon, Contractor's Lumber & Home Center, Willard OH~

I would like to tell you how satisfied we are with our purchase of Construction Maestro. The program does an excellent job of communicating to our customers the correct method to construct their project.

**ELIMINATES
COUNTLESS CALLS**

It eliminates countless calls between the materials supplier and the construction crew, as well as overages and shortages of materials. Your support of our software has been above and beyond any support we have ever experienced, thank you. Your staff has always been friendly and helpful, however we have been most impressed

with your personal expertise in both construction and the software package. Our only complaint is that we are waiting patiently for you to introduce other estimating packages such as decks, fencing, houses, etc!

~Ted Huntoon, Huntoon Lumber Company Inc, Marlette MI~

I hope my competitors don't buy it.

~Richard Eby, Michiana Building Supply, Niles MI~

I really like using Construction Maestro. It saves me lots of time generating estimates. The material, steel and pull lists can all be printed off to saving me even more time.

Everything is right there when I need it.

~Marvin Smucker, Smucker Builders, Chuckey TN~

**EVERYTHING IS RIGHT
THERE WHEN I NEED IT**

Construction Maestro has met all of our expectations. We've used other software programs in the past and have been disappointed. They didn't come close to what Construction Maestro can do for our company's estimating services.

~Kevin White-Owner, Bluegrass Metals, Scottsville KY~

**BOTTOM LINE, IT'S FAST,
EASY AND ACCURATE!**

employees as well as the customer. It has driven sales for me because it shows them exactly what to do and order. It shows them a 3D picture of what their project will look like. Bottom line, it's fast, easy and accurate! I highly recommend it because it's an inexpensive tool that can put you ahead of your competition, which will lead to added sales.

~**Joe Vella, Vella's Do it Best Home Center, Constantia NY**~

The Construction Maestro program has made my pole frame business so much more efficient that I thought I should write you a note about the program. Construction Maestro is an excellent program. It used to take me about two hours to do an

estimate and now the program generates all my drawings and a material takeoff in less than 15 minutes. I get a material list that I can fax to my supplier for all the building materials, including a steel order with all the steel lengths to the inch. My job foreman likes the program because it also generates a cut list for all his lumber and a

drawing that shows where each piece of material goes on the building. My waste has all but been eliminated. This program has been a great selling feature for my business also. I can show my customers a 2D and a 3D drawing of their building in a matter of minutes. This helps me sell a lot more buildings.

~**Tom Vermeesch, Quality Built Pole Buildings, Essexville MI**~

**GREAT SELLING FEATURE FOR
MY BUSINESS. THIS HELPS ME
SELL A LOT MORE BUILDINGS.**

Construction Maestro assures my estimates are accurate, which gives me added confidence in my pricing structure. Construction Maestro® is easy to adapt to. The greatest benefit is that after an estimate becomes an order, I can produce drawings and an accurate material list with a few clicks of the mouse!

~**William Moseley, Garages-N-More, Alburtis PA**~

WORTH EVERY DOLLAR

We told Symun Systems™, Inc that Construction Maestro was worth every dollar that we paid for it. I can't imagine us estimating without it. Construction Maestro is simple to use, the drawings are great, the software estimates materials

accurately, and the tech support is great!

~**Bob Kauffman, Kauffman Metals, Bedford PA**~

I am almost computer illiterate, but with Construction Maestro, figuring, estimating and drawing post-frame buildings is a snap. Any snags that I have come across have been easily solved by Mike or Tim. I would recommend this program to anyone. My customers have been amazed at this program and have made the statement that it is very professional. I look forward to working with everyone at Construction Maestro as new developments take place.

~**Dale Gay, LG Builders, Mobile AL**~

Since our discovery of Construction Maestro in 2004, it's become a tool many of our stores depend on to design buildings quickly and accurately. Being able to design exactly to a customer's specifications and provide them with exceptional drawings and diagrams is important to us. Construction Maestro helps our experienced sales staff deliver that higher level of service in the most efficient and professional way possible. Symun worked with us to integrate the program directly into our quote and point-of-sale systems which has greatly increased our efficiency as well. Mike, Tim, Jon, and Jessie are a pleasure to work with and I highly recommend the program to anyone looking for an edge in the building package business.

A TOOL MANY OF OUR STORES DEPEND ON.

~Mick Thompson, IT/Software Support, Sutherland Lumber Company~

I have sold a lot of post frame buildings and garages by sketching them out on graph paper and drawing a cross section. I spent so much time at this that my work week usually approached 60 to 70 hours. I always kept an eye out for a good estimating software package for post frame garages and barns at the

CONSTRUCTION MAESTRO IS SIMPLY THE BEST PROGRAM OUT THERE

local building shows. I finally found it. Construction Maestro is simply the best program out there. Even better than that, Mike Rinks and Tim Bennett are committed to keep making improvements. On the average, I would quote approximately 700 buildings a year before Construction Maestro. I would sell somewhere around 120 to 130 complete buildings (approximately 18%). After Maestro's

quick and easy set up I sold approximately 177 (approximately 25%) out of 700 even with the O.S.B. prices we had to deal with. I cut my work week to 50 to 55 hours. In short, I can quote more buildings with more options in less time than I have ever been able to do. The drawings are more professional. I enjoy working, but I don't enjoy treading my wheels. Maestro quotes are quick, accurate, and will help you and me both sell buildings and promote the post frame industry.

~John Colley, Zeeland Lumber Company, Zeeland MI~

Construction Maestro has made it a lot easier for Country Metals. We were amazed how this system puts out accurate quotes fast! Symun Systems is excellent with technical support. We are really impressed with this software!!

~Jason Zimmerman, Country Metals, Shiloh OH~
